

PROFESSIONAL EXPERIENCE

Microsoft Corporation – Redmond, WA & Cambridge, MA

Senior Product Manager – AI Security & Data Platform

Nov 2025 – Present

- Lead product for Intune in a greenfield initiative to govern autonomous AI agents (announced with OpenAI, Nvidia). Define zero-to-one specs and architecture empowering enterprise IT admins to manage agent discovery, guardrails and identity. Establish MVP and roadmap for enterprise AI governance, driving alignment across 7 orgs (60+ stakeholders).
- Defined strategy for data platform offerings, unifying disparate querying features into a single natural-language admin experience. Authored supporting papers and analyses, shipped UX improvements, established direction across the team.
- Turned a secure enterprise browser initiative, stalled for 3 years, into an exec-backed roadmap and delivery plan in 4 months; owned product definition, spec, design, engineering support and customer feedback cycle end-to-end.
- Strengthened team operating culture within 2 weeks of onboarding: rebuilt product processes and stood up a rhythm of business that no longer depended on any one person. Helped team leverage AI-assisted prototyping, research, etc. to compress decision cycles from weeks to days.

Senior Product Manager – Intune for Android Enterprise and AOSP

Aug 2022 – Nov 2025

- Owned frontline-worker device management for 10M+ devices across enterprise, government, and education. Expanded TAM from just Android Enterprise to billions of Android Open Source Project (AOSP) based devices. Led strategic hardware/software partnerships with Samsung, Meta, Zebra, Qualcomm and other OEMs on frontline and XR devices.
- Drove ~\$40M in annual upsell revenue through licensing expansion, by delivering highly requested, technically complex features (e.g. over-the-air OS updates, adopted by 500+ customers with 5K MAU in the first month).
- Unblocked and delivered other top customer-blocking features, representing millions of seats: remote assistance (after 2 years behind schedule, across 4 globally distributed teams) and LOB app management (via sustained Google partnership work).
- Ran white-glove customer previews with large retail and logistics enterprises to unblock adoption and drive product improvements.

Program Manager 2 – Intune for Android Enterprise

Sep 2018 – Aug 2022

- Led entry into the ruggedized-device market, growing from 0 to several hundred thousand devices managed in 3 years.
- Created industry-leading admin UX for a new device management standard (OEMConfig). Collaborated with Google and OEMs on the standards specification to improve ecosystem compatibility and adoption.
- Delivered the product in the Chinese market, navigating regulatory and technical challenges; led Microsoft-wide standardization of app publishing and push notifications for regional devices without Google access.

UX Designer – concurrent stretch role in addition to PM

Jun 2020 – Jun 2022

- Delivered UX designs and research for novel device form factors and BYOD experiences; built design guidelines and Figma libraries to increase team velocity and strengthen PM/UX collaboration.

Program Manager – Intune Cross-Platform Apps/Services

Sep 2016 – Aug 2018

- Led the redesign and modernization of a legacy web app, doubling NPS and making core user flows 10x faster, while delivering major UX, privacy, and branding improvements across iOS, macOS, Windows, and web clients.
- Led user-centered product redesign for an Intune-wide trust/privacy initiative (research, week-long design sprint, interactive prototyping, and 15+ hours of usability testing). Process later adopted as a model by other PM teams.

EDUCATION

B.S., Computer Science – Yale University

2012 – 2016

- Undergraduate research in human-robot interaction and real-time fMRI neurofeedback; 2 publications.

COMMUNITY SERVICE, LEADERSHIP AND INTERESTS

- Mentor to early-career ICs; board member on Microsoft's LGBTQ+ ERGs and Community Boating Inc. DEIB Committee.
- Invited speaker at [Grace Hopper Celebration](#) (2x), industry conferences on enterprise security, student outreach.
- Interests: Art, sailing (and teaching others), psychology, making music, languages (currently learning French).
